TOEIC 890 (B2)

SUMMARY

Open-source engineer building high-performance subtitle and media systems in Rust and TypeScript/WASM. Ships libbitssub (~5,400 npm downloads/month) for PGS/VobSub/DVB-SUB, rwss (rassa in the browser via WASM), and akarisub (libass in the browser with WebGPU/WebGL2). Also da-ocr (in-browser OCR), honya (JP→TH light-novel TUI), and rassa (experimental Rust ASS stack). Seeking WFH or Chiang Mai onsite roles in systems, media, or product engineering.

EXPERIENCE

Independent software engineer / open-source maintainer · 2025–present · Chiang Mai

- libbitssub — WASM renderer for PGS/VobSub/DVB-SUB (Rust+TS): WebGPU/WebGL2/Canvas, workers, Video.js/Shaka/hls.js/React · ~5,400 npm/mo · github.com/altqx/libbitssub
- rwss — browser ASS/SSA on rassa+WASM: RVFC, WebGPU/WebGL2, workers · npm @altqx/rwss · github.com/altqx/rwss
- akarisub — SSA/ASS in-browser on libass: WebGPU/WebGL2, Fontconfig, AES-GCM in-worker · github.com/altqx/akarisub
- rassa — experimental Rust ASS stack with a libass-compatible C ABI (not a speed claim vs libass) · github.com/altqx/rassa
- da-ocr — in-browser OCR (no upload) · ocr.altqx.com · github.com/altqx/da-ocr
- honya — Ratatui TUI for JP→TH/EN light-novel translation · honya.altqx.com · github.com/altqx/honya
- Also: akane (self-hosted HLS), Octodex (octodex.org), Rurushi (mini IPTV/HLS)

Software / game localization & fansubbing · 2019–present

- Fansubbing and localization (altqx.com/alphabet-works): Dota 2, CS2/Deadlock Thai fonts, Portal: Reloaded, Kainote, Mihon, Komga

IT Support intern — Lamphun Technical College · Nov 2020–Mar 2021

- Hardware, software, networking, classroom labs, Windows/mobile support

EDUCATION

B.B.A. Digital Business Innovation — Maejo University · 2023–2025 · GPA 3.43

- Capstone lead: data-mining model to detect fake news in Thai
- Team lead, online gas-ordering app — 2nd runner-up, innovation contest
- 2.5-month exchange at National Chin-Yi University of Technology (Taiwan)

High Vocational Certificate, Digital Business Technology — Chiang Mai Vocational College · 2021–2023 · GPA 3.45

SKILLS

Rust, TypeScript, JavaScript, WASM, C/C++, C#/.NET, Python, Next.js

WebGPU / WebGL2 / Canvas2D, libass, PGS/VobSub/DVB-SUB, HLS, Ratatui, Linux, Git, Bun, Docker

Thai (native) · English TOEIC 890 (Listening 475 / Reading 415, CEFR B2, Jun 2025–Jun 2027) · basic Japanese
